

WONTOK[®]

**“The Farmers Friend”
Wetter - Spreader - Sticker**

ACTIVE CONSTITUENTS: NON-IONIC ORGANIC SURFACTANT

For use with low or high-volume treatments to enhance the spreading and sticking of insecticides, fungicides, herbicides, fertilizers and folia nutrients.

WONTOK is useful to cover hard to wet plant surfaces

BENEFITS

WONTOK is used at low dose rate

WONTOK super spreader Increases sprayed target penetration and coverage

Helps reduce the problem of run off from sprayed waxy or hairy surfaces

WONTOK promotes rapid spreading to give a uniform protective film

Silicon content for improved plant and soil health (Plant growth promoter).

Compatible formulation for a wide range of applications and tank mixes

Gives freshness and shiny effect to leaves and fruits

When used in drip irrigation improves air ventilation and nutrient uptake in the root zone

APPLICATION

Apply WONTOK at least 30 mins before rain or overhead irrigation

Spray to the point of wetness, excessive use can cause wasteful run off

WONTOK can be used with alkaline sprays and mixes easily with all types of water

WONTOK does not injure the most tender foliage if used as directed

A wetter should be added only where directed on individual labels, as use with selective herbicides outside label directions may reduce crop selectivity.

Test spray to determine optimum rate

WONTOK has been proven to be a highly efficient, however timing, weather conditions, method of application and mixers with other chemicals is beyond the control of the seller

MIXING INSTRUCTIONS

1. Fill spray tank with water and begin agitation
2. Mix pesticide/foliar nutrients as directed by label while maintaining agitation
3. When tank nearly full, add WONTOK
4. Complete filling tank and continue agitation

DIRECTIONS FOR USE

SITUATION	RATE	COMMENTS
Herbicides Fungicides Insecticides Foliar fertilizers Micro-Nutrients	Standard foliar nutrient spray inclusion rate: 1 - 2 ml per 10 Lt water	Use higher rate for lower water volumes and as amount of pesticide in spray mix increases. Increase water volume as canopy density increases. Adjust rates of WONTOK and/or water volumes to obtain thorough coverage to the point of run-off
Foliar Spray Vegetables, Vineyards, Orchards, Tree crops, Plantations, Established Gardens	1.5 ml per 10 Lt water	For general applications Especially beneficial for hard to wet plant surfaces such as waxy/hairy leaves, fruit and dense foliage
Foliar Spray Gardens, Nurseries, Ornamentals Pot Plants	0.2 ml per Lt water	Very useful on hard to wet/waxy/hairy leaves and fruit
Surface Penetration Spray Sports turf, Home lawns, Golf – Bowling Greens	2.5 ml per 10 Lt water	Use sufficient volume of spray mix to get wetting / penetration through 'thatch'

PROTECTION OF WILD LIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Do not contaminate streams, rivers, waterways with the chemical or used containers

STORAGE & DISPOSAL

KEEP OUT OF REACH OF CHILDREN

Store locked up, in a cool dry place and safely away from foodstuffs

Do not store for prolonged periods in direct sunlight

Rinse container before disposal and add rinsing to spray tank

Do not dispose of undiluted product on site

Dispose of any unused product/drums according to local regulations

If recycling, replace cap and return clean container to recycler or collection point

If not recycling, break, crush or puncture and deliver empty container for appropriate disposal to an approved waste management facility

The above statements are based on information believed to be accurate and reliable

SAFETY DIRECTIONS

Will irritate the eyes. Avoid contact with eyes. When opening the container and preparing spray, wear goggles. Wash hands and goggles after use.

FIRST AID:

If poisoning occurs contact your doctor or Poisons Information Centre
